Karen language keyboard. Windows 7 language pack english download. Windows 7 korean language pack.

The categories are class roots, property roots, stative roots, perception-stative roots, physical roots, and action roots. Northern Kankanaey is listed as a separate language, p. 34. This language should not be confused with a related, but different, language in the Sagada area called Kankanay. This is because the glottal metathesizes with the second consonant under phonological constraints. Alternate names for the language include Central Kankanaey, Kankanai, and Kankanay.[2] It is widely used by Cordillerans, alongside Ilocano, specifically people from Mountain Province and people from the northern part of the Benguet Province.[3] Kankanaey has a slight mutual intelligibility with the

Ilocano language. Kankanaey: A Role and Reference Grammar Analysis. Word charts and definitions taken from Allen, Janet's Kankanaey: A Role and Reference Grammar Analysis.[3] Class roots Class roots are a class of nouns that are defined by physical or other sensory characteristics.[5] Example of class roots: Word Definition babai female, especially human beey house, home of person or anima; container where something is usually kept begas hulled rice Property Roots Property roots point out a characteristic like size, taste, color, etc.[6] Example of property roots: Word Definition na lokneng soft (easily cut) na emas sweet, tasty ando tall, long Stative Roots Stative roots point out a temporary physical condition. Dialects Ethnologue lists Mankayan-Buguias, Kapangan, Bakun-Kibungan, and Guinzadan as dialects of Kankanaey. pp. 23-30. { cite book } : CSI maint: location (link) ^ Allen, Janet L. 6, No. 2: Summer Institute of Linguistics. The predicates that form are determined by the interaction of the affixation to the semantic properties of the root that are relevant in its context. The 23rd Psalm in the Kankanay Psalter. Kankanaey is spoken in northern Benguet, southwestern Mountain Province, southeastern Ilocos Sur, northeastern La Union, and southwestern Ifugao. Distinctive Features in Kankanaey. Aktionsart is a way to categorize event semantics, proposed by Vendler (1967), by if they are "happening" or are static, and it distinguishes them by their temporal properties and its dynamicity. Northern Kankanaey is spoken in western Mountain Province, southeastern Ilocos Sur, and southern Abra. Philippines: SIL International Publications in Linguistics. The letter /e/ in Kankanaey is to be pronounced as this sound, and not as the e in words like bet or wet. Kankanaey has many roots that have canonical shapes that appear to possess reduplication. All of these irreducible roots are not examples of reduplication as a word-building process.[10] Prefixes Many Kankanaey affixes are normal prefixes that come directly before the root such as the ka- in katokdo, "seat-mate," from tokdo. pp. 30-31. Of particular phonological interest is the very common occurrence of what is called the "barred l" in IPA. Phonology Consonants Labial Alveolar Palatal Velar Glottal Plosive voiceless p t k ? voiced b d g Nasal m n ŋ Fricative s Lateral l Approximant w j Stops can be heard as unreleased, when in syllable-final position.[4] Vowels Front Central Back Close i i ~ ø o ~ u Mid Open a Allophones of /l, a/ are heard as [l, A]. Allophones of /o/ can be heard as [o], [u]. Rather than having the action root modified, Kankanaey roots are very specific as to what the action is. Some roots drop their last vowel when suffixed, as in datngan (come upon, find) from dateng (arrive). [11] Infixes To change Yayos, "flow down," to Tomayos, "flows down," the predicating affix -om- is infixed after the first consonant of the root word. ISBN 978-1556712968. They may denote location, direction, or manner of movement.[9] Example of physical roots: Word Definition tedted drip ali move toward speaker, come saa go home balalong move downwards, descend sekad stamp, stomp tagtag run Action Roots Action roots point out an activity by a living and sometimes intentional participant. Many roots indicate the receiver of the action.[9] Example of action roots: Word Definition togda eat lunch tilid carry something on one shoulder tobʔong put a relatively small amount of something into a relatively large amount of water tod yok jab or poke upwards at something mangan to eat Reduplication Multiple types of reduplication are used when forming words in Kankanaey. p. 36. Retrieved from "References ^ Kankanaey at Ethnologue (18th ed., 2015) (subscription required)Northern Kankanaey at Ethnologue (18th ed., 2015) (subscription required)Maeng Itneg at Ethnologue (18th ed., 2015) (subscription required) ^ "Kankanaey". Retrieved 2016-09-15. Unaffixed or affixed roots may experience reduplication, and have their first CV, CVC, or CV(C)CV of the base form copied, with each type of base executing different functions. ^ Allen, Janet L. However, in this example, vowel reduction occurred when the infixes were added before the vowel, causing the infixes -in- and -om- to become -inm-. Some words with this sound are as follows: emmey - to go entako - let's go (a contracted form of emmey tako) ed - a preposition showing location or time marker (e.g. ed Baguio = in Baguio, ed nabbaon = in the long-ago times) ippe-ey - to put eng-gay - only, finish Grammar Kankanaey Content Roots Kankanaey content roots divide the Kankanaey lexicon into different categories to define their usage and word type. Kankanaey roots deeply rely on the combination with their affixes to determine their meaning in phrases and clauses. 2014. An open page of the Kankanay Hymnal. (1975). These are called circumfixes and have their own unique meanings, not a combination of the two parts.[13] Examples taken from Allen, Janet's Kankanaey: A Role and Reference Grammar Analysis.[13] Original (and meaning) Circumfix Circumfixed Version (and meaning) ila (to see) ka-...-an ka-ila-an (appearance) oto (to cook) i-...-an i-oto-an (to cook for someone) Predicate Formation The Kankanaey vocabulary is arranged by root morphemes, and points out the important semantic properties of each root. p. 35. This is also one of the vowels in a few other Northern Luzon languages like Iloko and Pangasinan. However, some CVC reduplication is applied after the prefix is added to the beginning of the stem such as the ma- and CVC- in magmageyek, "ticklish," from geyek, "to tickle". When forming binombontak, "were exploding," from betak, "explode," the reducible vowel and reduplication steps were re-ordered so no vowel reduction was experienced.[12] Some highly marked affixes have an infixed glottal stop leading the second vowel such as when forming bangbangʔa, "little old pots, toy pots," from banga, "pot".[12] Circumfixes A lot of affixes consist of a prefix or an infix, which is also followed by a suffix. p. 30. Result-stative roots are states that are changed by an outside source.[7] Example of stative roots: Word Definition natey dead, deceased gadgad mangy kemi dented in, partially crushed nabeteng drunk Perception-Stative Roots Perception-stative roots point out a perception by a living being, such as physical, emotional and mental perception-states. Some action roots indicate the direction of that action with respect to another participant; others denote a participant as involved with the action but not the end receiver. p. 31. ^ a b Allen, Janet L. ****Kankanaey: A Role and Reference Grammar Analysis**** Dallas:SIL International ^ Allen, Lawrence P. p. 33. If the root is one-syllable or if it is vowel reduced, then the reduplication is applied after the predicative affixation such as the ma- and CVC- in matmatey, "dying," from tey, "dead".[11] Suffixes According to Allen, Janet's Kankanaey: A Role and Reference Grammar Analysis, only "two predicating affixes are suffixes, -en and -an. This is because reduplication usually precedes both the predicating infixation and aspect infixation. A lot of reduplicative affixation is used before the prefixation such as the CV- and na- in nabebeteng, "was drunk," from beteng, "drunk". According to Allen, Janet's Kankanaey: A Role and Reference Grammar Analysis, "VVLP (1997) and Van Valin (2005) expanded the list of categories to reflect resultant situations, adding semelfactives and complex predicates-active accomplishments and causatives." [7] Gallery Cover of the Kankanay Hymnal . In kinaan, "removed," the perfective affix -in- is infixed after the first consonant of kaan, "to remove". [12] Pinmanapanakpak, "was repeatedly hitting/slapping," is formed by first reduplicating the word panakpak, "hit with slapping sound," into panapanakpak, and then the predicating infixation and aspect infixation are added. Some roots lose their first vowel when they are prefixed such as the e in ʔemis, "sweet, tasty," when prefixed to mamʔis, "sweet, tasty". It is the unrounded, high mid vowel on the IPA chart. A pile of Kankanay Hymnal in the Church of Saint Mary, an Episcopal Church in Sagada, Mountain Province, Philippines. Living beings are able to actively perceive with control and content, so these roots form predicates of a wider range than those formed from simple stative roots.[8] Example of perception-stative roots: Word Definition nailak see, look at bongot angry kibtot startled kiyapot rushed, stressed Physical Roots Physical roots point out movements and position such as natural movements, body movements, and positions, but not bodily functions. (2014). ^ a b c Allen, Janet L. Austronesian language spoken in the Philippines KankanaeyKankana-eyNative toPhilippinesRegionNorthern LuzonEthnicityKankanaey peopleNative speakers(240,000 cited 1990 census - 2003)[1]Language familyAustronesian Malayo-PolynesianPhilippineNorthern LuzonMeso-CordilleranCentral CordilleranNuclear CordilleranBontok-KankanayKankanaeyLanguage codesISO 639-3Variously:kne - Kankanaeyxnn - Northern Kankanaeyitt - Maeng ItnegGlottologkank1245Area where Kankanaey (including Northern Kankanaey, but not Maeng Itneg) is spoken according to Ethnologue Kankanaey (also spelled Kankana-ey) is a South-Central Cordilleran language under the Austronesian family spoken on the island of Luzon in the Philippines primarily by the Kankanaey people. p. 32. Philippine Journal of Linguistics Vol. These irreducible roots can contain one syllable that is repeated such as taktak and baba, but other roots can contain a repeated syllable with a prefix or infix such as togjinggag and wagawag. pp. 34-35.
